Product Features & Specifications:

- Authenticated numbers only get answered
- 10 Numbers can be updated by sending SMS.
- Mobile and Landline numbers supported.
- Output control Relay—by SMS with status
- Excellent voice quality of Mic. with Gain control
- Loud and clear Speaker output.
- LED Indications for Network Range & AC power on indication.
- Readable System updates and firmware status

VIGHNAHARTA

Technical Specification:

Power Supply	12VDC/2A Minimum
Power Consumption	Ultra low (idle current 30mA max.)
Max operating current	150mA.
LED Indication and outputs	Blue LED: For Range indication. 600ms/blink: No range (Searching for range) 3 sec/blink : Range available Red LED : AC power on indication. Green LED : GSM module ON indication. Output: 1 /2 Relays to control devices (05 A rating)
External connections	Mic.
MIC Specifications	High definition audio Microphone (Separate) Power supply : 12VDC. Monitor Area: Up to 10 meters.
Speaker Specifications	Impedance : 4Ω/8Ω Power output : Up to 2W
SIM Details	Micro GSM SIM
Dimensions	(100 x 84.25 x 40)mm(L x W x H)
Operating Temperature	0°C to 50°C
Humidity	90% Rh

Applications:

- ATMs/ Banks
- Control rooms
- Warehouse etc
- Security gates/cabin etc
- School bus/ Schools etc
